

THE WANAGAZETTE FROM 13 QUAI DU COMMERCE

HAPPY NEW YEAR 2026!

In this gazette, we look back at the projects that shaped our year and explore what 2026 has in store. Thank you for being part of this journey and enjoy the read!

2026 : ANOTHER YEAR BY YOUR SIDE

After an intense 2025, we enter this new cycle with energy, humility, and the desire to continue building with you.

Among the highlights, this year we showcased our involvement in the Paris Olympic Games a human and technical challenge of remarkable scale. Our teams rose to the occasion, supporting on-site actors with calm and expertise, leaving a lasting mark on our history.

2025 was also transformative for our video game activities: **Species: Unknown** enjoyed a successful launch, confirming our ability to deliver ambitious and

creative productions. **YouRescue**, developed by Wanadev, will continue its trajectory in 2026 with a **wireless version** and a **standalone device**, opening new possibilities for immersive training.

These achievements are the result of our teams' dedication and your trust. 2026 promises to be dense, with new collaborations and fresh ideas. We look forward to discussing them with you, whether to imagine new uses or simply share a coffee in Lyon. Thank you for continuing this adventure with us!

Côme

AFTER CELEBRATING OUR 15TH ANNIVERSARY LAST YEAR, WANADEV IS KICKS OFF 2026 WITH A NEW IDENTITY

Over fifteen years, the market, our teams and our partners have changed. This new brand identity unifies all our entities under a single banner:

Wanadev, shaping innovative experiences.

LOOKING BACK AT 2025: A COLLECTIVE IMPULSE

This year, numerous projects took shape thanks to long-term collaborations between all Wanadev brands and you, our trusted partners, users and players. These rich and ongoing relationships are what have fueled our work and evolution for more than 15 years.

PROJECTS THAT MOVED FORWARD

Whether building a video game, an immersive product or a bespoke web solution, the path is often the same: learning from the past, refining methods and technologies, co-constructing and always adding a spark of boldness.

UNIDENTIFIED CREATURES AHEAD!

To close out the year, **WanadevStudio** released the early access version of **Species: Unknown**, a cooperative survival-horror game where players must complete missions while facing strange and unpredictable creatures.

It's our first Steam game that isn't VR and for a first, we can be proud: **100,000 players in one month**, from all around the world, with **94% positive reviews**.

A growing community is already providing precious feedback, helping us continuously improve the game.

YOURESCUE GOES WIRELESS

Based on your feedback, YouRescue continued to evolve this year with a focus on **wireless streaming** via the PICO 4 Ultra headset: more freedom, fewer cables, improved comfort for trainers.

And this is only the beginning, the team is developing new features to make immersive training even more efficient.

YouRescue is an immersive simulator dedicated to risk-management training, developed by **WanadevImmersive**.

PODOFIT: A MODERN WEB APP FOR HEALTHCARE PROFESSIONALS

For several years, we have been supporting **Ergorecherche**, a manufacturer of orthopedic insoles, in transforming their professional software into a web application designed for podiatrists.

This project brings together experts from WanadevDigital to ensure continuous availability and a solid, long-term partnership. Step by step, and well-shod, we move forward together.

THANK YOU

More candles on the cake

2025 was also another year of long-term collaboration with several trusted partners such as Logicos, Bematrix and Adeo with whom we have now been working for 6, 7 and 15 years!

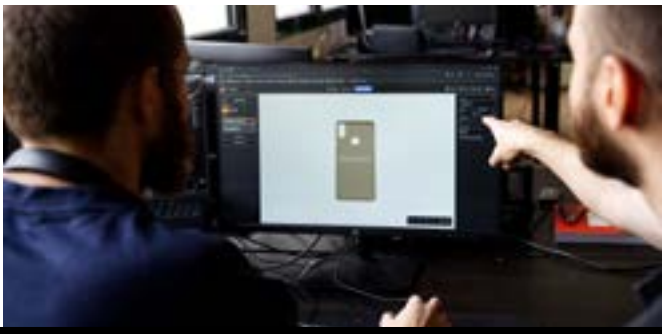

INNOVATE & EVOLVE

A NEW BRAND JOINS THE WANADEV FAMILY

In our previous gazette, we announced the acquisition of the solution Naker. Continuous improvements are underway and new features have already been released.

The goal: making 3D accessible for e-commerce players.

With Naker, we aim to offer an alternative to fully bespoke solutions, which are more complex and heavier to deploy.

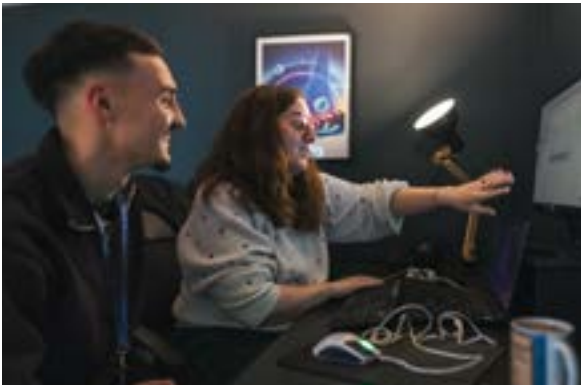

HAVE YOU HAD YOUR WANAMIAM TODAY?

JOIN US FOR A TALK... AND A SLICE OF PIZZA!

At **Wanadev**, **wanamiams** are our informal morning gatherings, fueled by brioches, pastries or colleagues' latest culinary experiments. They help us start the day right.

And we love sharing these moments with the professional communities around us. This year, we hosted Game Only, AFPy, PostgreSQL Users, No-Code France, AFUP and Apéro Web Lyon for meetups and technical talks, always wrapped up with a friendly aperitif.

Nothing sparks ideas like pizza and curious minds.

AI: A MAJOR PLAYER IN DIGITAL TRANSFORMATION?

As in many industries, AI is reshaping processes in web development.

For WanadevDigital, artificial intelligence is an ally to enhance our efficiency and support your specific challenges.

Image detection, file processing, automated plan generation, 3D model creation, ongoing projects promise major transformations for our products.

WANADEVSTUDIO LAUNCHES ITS FIRST MOBILE GAME

Your Viking rhythm game blending rock and metal is now available on iOS and Android. Play anywhere, enjoy quick sessions, unlock new tracks and lead your longship to victory. Thank you to the community and to all the bands supporting this new adventure.

AHOUUUUUUUUUUUU !

Ragnarock has been a **WanadevStudio** franchise since 2020.

DID YOU KNOW?

AUTOMATING KITCHEN DESIGN WITH 3D TOOLS

After several years of development, the **WanadevDigital** and **Adeo** teams created **Coach Cuisine**, a new feature within **Kazaplan** that automatically generates multiple kitchen layouts based on user preferences, budget and space constraints.

Blending technical and domain expertise, this tool speeds up in-store sales and provides a reliable base before customization.

Dinner is served!

VESTIGES: FALLEN TRIBES, DIVE INTO STRATEGY

This year, our team reached a new milestone with the release of *Vestiges: Fallen Tribes*, a turn-based strategy game on Meta Quest and Steam PC/VR. Plunge into a tribal sci-fi universe where factions battle for control of water, and where your tactical decisions shape the future. A new independent production from **WanadevStudio!**

HOW ABOUT A GAME OF WANAFOOT?

Wanadev has its own football team training (almost) every week! Thanks to our proximity to **Sport Dans La Ville**, we meet for 5-a-side matches: sometimes technical, often hilarious, always in good spirits. We even faced fellow Lyon-based companies such as **Pilot'in**, **RyseUp Studios** and **Bandai Namco**.

Got a team? Challenge us for a Wanafoot!

ON THE ROAD TO 2026

Wanadev

Happy New Year!

IMAGINING THE FUTURE TOGETHER

Just like last year, we are shaping what comes next with ambition. What we love most is playing with technologies and crafting innovative digital experiences. Good news: that’s exactly the plan for 2026!

PUSHING TECHNOLOGICAL INNOVATION FORWARD

SPECIES: UNKNOWN HEADS INTO 2026

100,000 players in one month! A promising start for the early access phase. 2026 will be full of excitement as the game heads toward its 1.0 version, built closely with the community. Keep surprising us with your wildest missions!

IMMERSIVE TRAINING: NO SLOWDOWN IN 2026

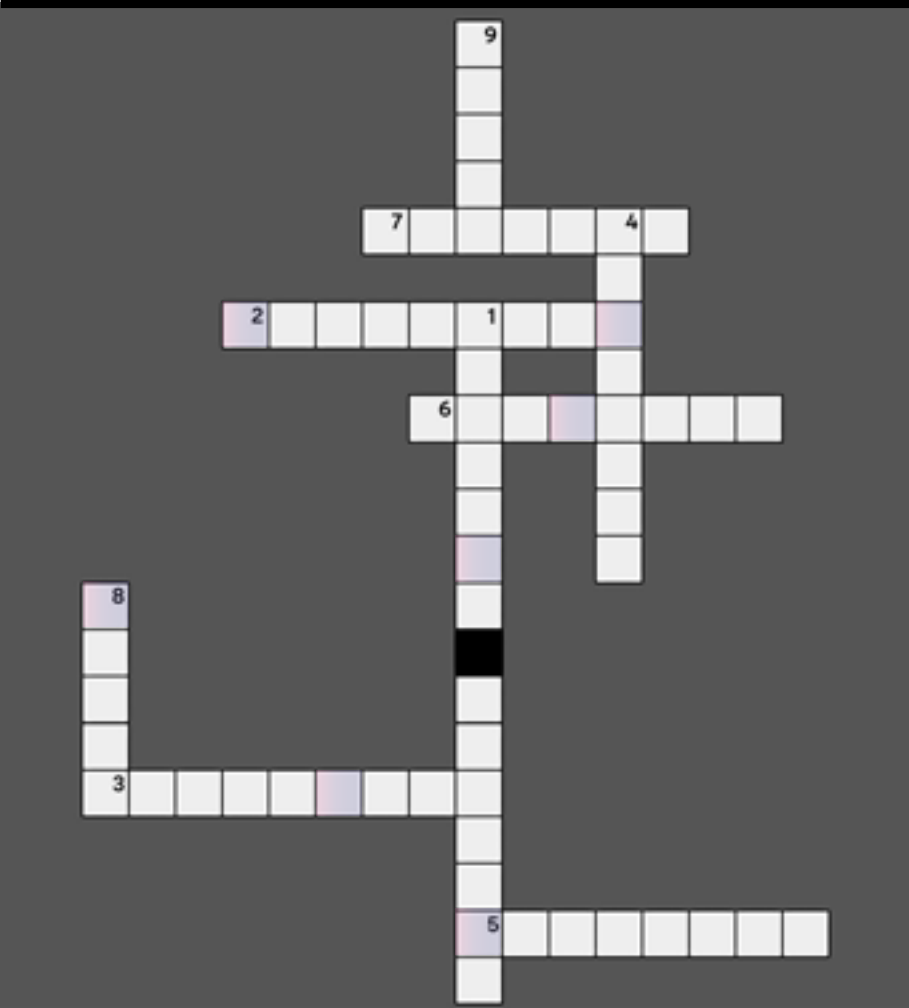

Immersive technologies evolve quickly and opportunities multiply. **YouRescue** will continue its innovation journey with autonomous, increasingly lightweight devices and simulators.

VESTIGES: FALLEN TRIBES BRINGS STRATEGY INTO YOUR LIVING ROOM

A major evolution is coming in 2026, **Vestiges: Fallen Tribes** will be playable in mixed reality, meaning the game appears directly in your living room, blending virtual elements with your real-world environment through Meta Quest headsets. A technical challenge serving immersion, and a first for **WanadevStudio** at this scale.

WANAGAME?

VERTICAL

- 1. Cooperative survival horror game that reached 100,000 players in 1 month
- 4. Visual element completely redesigned this year
- 8. SaaS solution making 3D accessible for e-commerce
- 9. Type of reality blending virtual and real-world environments

HORIZONTAL

- 2. Immersive training simulator for risk management
- 3. Viking rock and metal rhythm game
- 5. Friendly gathering around croissants, pastries, and other treats at Wanadev
- 6. Company whose name references an iconic movie, partnered with us for 7 years
- 7. Web application for podiatrists, enabling the creation of custom orthopedic insoles environments
